

ME AND MY CAR

Me: Gordon Murdoch
My Car: 1969 TR6

Gordon's TR6 was fully restored when he bought it in 2001. The car was originally an American export model which was re-imported by the previous owner, who did a total restoration which included the conversion to right hand drive. The car was finished in Sapphire Blue, with a leather interior, burr elm dash, and it runs on Minilite replicas.

Being an American spec car originally, it has twin Strombergs rather than the Lucas fuel injection. It also has no overdrive but Gordon says he doesn't miss these features too much because he also has a TR5 which does have them!
